THARUN THANNEERU

6300964404 thanneerutharun@gmail.com GitHub LinkedIn Hyderabad, India

Professional Summary

Computer Science Engineering (Data Science) graduate skilled in SQL, Python, data analysis, and data validation. Built projects involving transaction monitoring, rule-based checks, model evaluation, and troubleshooting. Strong analytical thinking, attention to detail, and problem-solving skills. Seeking an entry-level Quality Engineer role focused on analytics testing, data accuracy, and software quality.

Technical Skills

Programming Languages:	Python, Java, C, R, SQL, HTML, CSS
Testing & Quality:	Test Scenarios, Data Validation, Functional Testing Concepts, Regression Testing Concepts, Defect Investigation
Data Analytics:	Power BI, Excel, Pandas, NumPy, Statistics, EDA, Data Reconciliation
Databases:	MySQL, Oracle Database, MongoDB, SQL Queries, Data Integrity Checks
Tools:	Microsoft Word, Excel, PowerPoint, Google Sheets, Git/GitHub, Jupyter, Google Colab
AI & Machine Learning:	scikit-learn, PyTorch, TensorFlow/Keras, CNNs, Model Evaluation

Experience

Salesforce Developer Intern *2025*

Agentblazer Champion Program

- Completed an 8-week virtual internship in Salesforce development, Apex programming, cloud technologies, and application workflows.
- Earned Agentblazer Champion status through specialized learning and certification-based activities.
- Followed structured development workflows and reviewed application outputs during practical exercises, strengthening attention to detail and problem-solving skills.

Projects

Real-Time Transaction Monitoring and Data Validation

- Built a Kafka and SQL pipeline to process transaction events and analyze structured data.
- Applied rule-based and statistical checks to flag anomalies and investigate suspicious transaction patterns.
- Evaluated results for data consistency, exceptions, and pipeline reliability.
- Examined transaction patterns and validation results to identify inconsistencies and support reliable data processing.

Multi-Label Knee Abnormality Classification

- Developed a medical-image classification workflow using ConvNeXt, CoAtNet, and DINO architectures.
- Compared predictions and applied model blending and label-specific weighting, achieving a Kaggle score of **0.954**.
- Automated preprocessing and inference for repeatable model evaluation.
- Assessed prediction outputs across model configurations to compare performance and evaluate result consistency.

MeshTalk – Peer-to-Peer Messaging Application

- Developing an Android messaging app using Kotlin and Bluetooth sockets for offline device-to-device communication.
- Implemented connection management, message transmission, and local chat persistence using SQLite/Room.
- Organized communication, database, and UI components to support troubleshooting and integration.
- Checked messaging workflows and connection handling to investigate potential communication and persistence issues.

Education

Jawaharlal Nehru Technological University Hyderabad *2022–2026*

B.Tech, Computer Science Engineering (Data Science) – CGPA: 8.5/10

Resonance Junior College *2020–2022*

Higher Secondary Education (MPC)

Iris World School *2019–2020*

Secondary Education (ICSE)

Certifications

- PCAP: Programming Essentials in Python – Cisco Networking Academy
- Machine Learning Specialization – DeepLearning.AI and Stanford Online
- Deep Learning Specialization – DeepLearning.AI
- Google Advanced Data Analytics Professional Certificate – Google
- AWS Certified Cloud Practitioner – Amazon Web Services
